
JAY SHARMA

Redmond, WA • (672) 515-7744 • jsharma1105@gmail.com

[LinkedIn](#) • [GitHub](#) • [Portfolio](#)

- Software Engineer with 10+ years of experience designing, developing, and integrating enterprise solutions using C#, .NET, and Azure.
- Hands-on experience with Azure AI services, applying AI-assisted development and intelligent automation to deliver scalable, production-ready software.
- Proven ability to build and ship end-to-end solutions across the full development lifecycle, with a strong emphasis on quality, testing, and CI/CD integration.
- Experienced with both manual and automated testing strategies, contributing to reliable, maintainable codebases in agile team environments.
- Collaborative team member with a track record of effective cross-functional communication, translating technical requirements into working software on schedule.

WORK EXPERIENCE

Infosys Limited • Redmond, WA • 03/2019 - Present **Technology Lead**

- Built and deployed C# / .NET applications on Azure (IaaS, PaaS, SaaS), leveraging cloud-native architecture for scalability and performance.
- Improved SQL query performance and reduced post-release defects through database optimization and rigorous unit/integration testing.
- Built and evaluated RAG (Retrieval-Augmented Generation) pipelines using Azure AI Foundry and Azure OpenAI, grounding LLM responses in enterprise knowledge bases for accurate, context-aware outputs.
- Designed and implemented MCP (Model Context Protocol) servers in .NET, enabling structured tool use and context-aware interactions between LLMs and enterprise data sources.
- Leveraged Azure AI Foundry for model deployment, prompt engineering, and evaluation, applying responsible AI practices across the development lifecycle.
- Built and maintained CI/CD pipelines in Azure DevOps, automating build, test, and deployment workflows to accelerate release cycles.
- Authored complex KQL queries in Azure Monitor / Log Analytics for debugging, telemetry analysis, and operational insights.
- Designed and maintained Azure Data Factory (ADF) pipelines for large-scale data ingestion, transformation, and orchestration across cloud and on-premises sources.
- Developed end-to-end data integration workflows using Azure Synapse Analytics, combining big data and data

SKILLS

C# .NET, JavaScript, SQL, Azure AI Foundry, MCP, RAG, AI Agents, Agentic AI, A2A, Microsoft Azure IaaS / PaaS / SaaS, Azure DevOps, CI/CD, ADF, Azure Synapse Analytics, Power BI, KQL, ETL, NoSQL, Power Apps, Power Automate, Azure Logic Apps, Git, Agile / Scrum

EDUCATION

Master of Science in Information Technology and Management

Illinois Institute of Technology
Chicago, IL
12/2016

Bachelor of Engineering in Information Technology

L. J. Institute of Engineering and Technology
Ahmedabad, India
07/2014

warehousing capabilities to enable real-time analytics and reporting.

- Led vendor team coordination, driving delivery through task delegation, mentorship, and stakeholder alignment.

Populus Group • Oak Brook, IL • 11/2017 - 03/2019
Software Engineer

- Architected and deployed scalable, secure Azure solutions — App Services, Azure Functions, Azure SQL, and Azure DevOps CI/CD pipelines — ensuring high availability and resilience for mission-critical applications.
- Developed C# / .NET applications with SQL-backed data layers, optimizing query performance and database efficiency to support high-throughput, data-intensive workloads.
- Contributed to Angular and JavaScript frontend development, enhancing UI interactivity, component reusability, and cross-browser user experience.

iAOS Solutions • Schaumburg, IL • 06/2016 - 11/2017
Software Engineer

- Developed robust, responsive web applications using C#, MVC, and SQL, focusing on clean architecture, efficient data management, and scalable backend design patterns.
- Integrated AWS cloud services with JavaScript frameworks to deliver dynamic, high-performance frontend experiences and cloud-backed application workflows.

Meditab Software • Ahmedabad, India • 06/2014 - 12/2014

Technical Support Developer

- Diagnosed and resolved complex software issues in C# / .NET, delivering timely bug fixes and performance improvements to maintain optimal application reliability.
- Partnered with cross-functional teams to analyze user-reported issues, implement effective solutions, and drive continuous improvement in product quality and user experience.
